

"Making Life Easier For Everyone"

The GTX Gaming Radio Button is a wireless Gaming Room Paging System, designed for Clubs and Hotels not equipped with a poker machine loyalty system. GTX Gaming Radio Button enhances customer service by providing efficient messaging to roving staff - a simple press of a button alerts the wait staff as to the call origin and service required.

GTX Gaming Radio Button is well suited to additional 'call point button' installation throughout the venue - bottleshop, bistro, loading dock, or offices. Staff are readily located and informed as to the location and action required.

System Benefits

- Fully compatible with UniPage family of products
- Simple and easy to use
- Improved customer service and satisfaction
- Machine down times reduced
- Increase turnover
- Better staff utilisation
- No computer required
- No Gaming Loyalty System connection required
- Supports different service types (eg Service, Promo, payouts, etc)
- Improved security
