

Communicating Can Be Quick & Simple

The UniPage MTX-1 and MTX-8 are battery powered remote radio button transmitters. Easily mounted these units provide direct communications to alphanumeric/ numeric or tone pagers - simply add a MTX-8 to work with your existing pagers.

Ideal for WaiterCall and small GuestCall system or simply to alert a pager to "attendance required" at a reception or loading dock. Connect directly to a sensor (security or industrial) to be alerted when a contact is activated.

The MTX-1 Single transmitter can be discreetly mounted providing a one touch location based message for assistance (these units can also be linked to an auto dialler or alarm system if required)
