

WTX PAGING SYSTEM

ALWAYS IN-TOUCH

UniPage-WTX is a new generation of paging system that allows the venue to stay in-touch with their patrons and staff.

Patrons are alerted with a slick pager or SMS to either return to the point-of-pager-issue or directed via the LED display to a collection point for food, beverage or table seating.

Staff are alerted via an alphanumeric pager or SMS as to pokie (EGM) status regarding membership, or service calls.

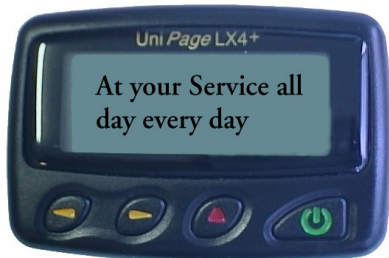

Priority paging and web interface allows graphical viewing.

Smartphone logon and messaging to pagers from device.

Emailed LOG files

SMS calls to pagers—escalated, manual and/or staff calls

No ongoing costs—no PC required.

SPECIFICATIONS:
